

Code-Layout, Readability and Reusability

Date	30 September 2026	Team ID	6ab3e57da238dc999eb3d44d
Project Name	EduGenie – AI-Powered Learning Assistant	Maximum Marks	As per template

Team Members: Benita Genesis I, Ricardo Dominic Victor, Nivetha E, Bhuvaneshwaran

GitHub: <https://github.com/ricardovictor-28507/Google-Cloud-Generative-AI--A-S>

S.No	Code Quality Parameter	Status	Remarks
1	Consistent indentation	Yes	Python files use consistent 4-space indentation.
2	Proper file structure	Yes	Feature modules, static assets, templates and docs are separated.
3	Meaningful variable names	Yes	Names such as `ai_service`, `generate_quiz`, `answer_question` describe purpose.
4	Function / method names	Yes	Focused names reflect the action performed.
5	Comments / documentation	Partial	Core docs are extensive; some simple functions rely on clear naming rather than comments.
6	Modular design	Yes	Five workflows use separate modules and share one AI service.
7	No redundant code	Yes	AI configuration is centralized instead of duplicated in each module.
8	Error handling	Yes	Runtime errors, invalid input and quiz JSON errors are handled.

Reusable Components

Component	Technology	Where Reused	Reusability
AIService	Python	All five AI workflows	High
FastAPI request models	Pydantic/FastAPI	QA, summarize, explain, quiz, learning path	High
Frontend renderer	JavaScript	Text responses and quiz interaction	Medium
Markdown formatter	JavaScript	Generated text results	Medium
