

Project Executable Files

Date	30 September 2026	Team ID	6ab3e57da238dc999eb3d44d
Project Name	EduGenie – AI-Powered Learning Assistant	Maximum Marks	As per template

Team Members: Benita Genesis I, Ricardo Dominic Victor, Nivetha E, Bhuvaneshwaran

GitHub: <https://github.com/ricardovictor-28507/Google-Cloud-Generative-AI--A-S>

Step 1: Submission Checklist

S.No	Item	Submitted
1	Source code	Yes
2	requirements.txt	Yes
3	.env.example	Yes
4	README and developer docs	Yes
5	Template phase PDFs	Yes
6	Frontend templates/static assets	Yes
7	GitHub repository reference	Yes

Step 2: File / Folder Structure

The submission combines the working EduGenie source tree with the eight assessment phases. The original `docs/` folder remains the technical documentation area, while the numbered phase folders contain the completed project-process deliverables.

Step 3: Access Details

Field	Details
Repository	https://github.com/ricardovictor-28507/Google-Cloud-Generative-AI--A-S
Local URL	http://127.0.0.1:8000
API docs	http://127.0.0.1:8000/docs
Health check	http://127.0.0.1:8000/health

Step 4: Run Instructions

Create virtual environment → install `requirements.txt` → copy `.env.example` to `.env` → add Gemini key if available → run Uvicorn → open the local URL. Demo mode works without a key.

Step 5: Known Limitations

- No user authentication or saved learner history.
- No persistent database in the current MVP.
- Performance/load benchmark has not been completed.
- AI-generated educational content requires human/trusted-source review.
- Live Gemini operation depends on valid API access and configured model.
