Project Description

EduGenie is an AI-powered learning workspace for learners who want quick answers, beginner-friendly explanations, summaries, practice quizzes and a guided learning path. The system uses FastAPI for its backend, a browser interface for interaction, and Google Gemini for generative AI.

Project Workflow

Step	User / System Action
1	Learner opens EduGenie and selects a learning tool.
2	Learner enters a question, topic or study passage.
3	Browser sends JSON to the matching FastAPI endpoint.
4	FastAPI validates the input and calls the focused feature module.
5	Feature module creates a learner-oriented prompt.
6	AIService calls Gemini or supplies a local demo response.
7	The UI renders the response; quizzes become interactive.

Documentation Set

- README – installation and project overview
- PROJECT_OVERVIEW.md – architecture and workflow
- API_DOCUMENTATION.md – REST endpoints
- AI_INTEGRATION.md – Gemini integration and reliability
- SETUP_GUIDE.md – local setup
- USER_GUIDE.md – learner instructions
- TEAM_WORK.md – contribution plan
